

Built by Fairfield House & Garden Company, the open design of this Bali-inspired pool house makes you feel like you are outdoors, while providing all the comforts of inside. Weatherproof materials also create a natural look that visually connects the space to the pool terrace.

This outdoor pavillion, designed and built by Lecher Development with interiors by Sage and Ginger, has a generous seating area, built-in barbeque and mini fridge, vaulted ceiling, and recessed heaters and lights for use in all seasons.
